

Product datasheet for **TA807191**

Angiopoietin 1 (ANGPT1) Mouse Monoclonal Antibody [Clone ID: OT18C5]

Product data:

Product Type:	Primary Antibodies
Clone Name:	OT18C5
Applications:	WB
Recommend Dilution:	WB 1:500
Reactivity:	Human
Host:	Mouse
Isotype:	IgG1
Clonality:	Monoclonal
Immunogen:	Human recombinant protein fragment corresponding to amino acids 20-320 of human ANGPT1(NP_001137) produced in E.coli.
Formulation:	PBS (PH 7.3) containing 1% BSA, 50% glycerol and 0.02% sodium azide.
Concentration:	1 mg/ml
Purification:	Purified from mouse ascites fluids or tissue culture supernatant by affinity chromatography (protein A/G)
Predicted Protein Size:	57.3 kDa
Gene Name:	angiopoietin 1
Database Link:	NP_001137 Entrez Gene 284 Human
Background:	Angiopoietins are proteins with important roles in vascular development and angiogenesis. All angiopoietins bind with similar affinity to an endothelial cell-specific tyrosine-protein kinase receptor. The protein encoded by this gene is a secreted glycoprotein that activates the receptor by inducing its tyrosine phosphorylation. It plays a critical role in mediating reciprocal interactions between the endothelium and surrounding matrix and mesenchyme and inhibits endothelial permeability. The protein also contributes to blood vessel maturation and stability, and may be involved in early development of the heart. Alternative splicing results in multiple transcript variants encoding distinct isoforms. [provided by RefSeq, Dec 2010]
Synonyms:	AGP1; AGPT; ANG1
Protein Families:	Druggable Genome, ES Cell Differentiation/IPS, Secreted Protein

Product images:

HEK293T cells were transfected with the pCMV6-ENTRY control (Left lane) or pCMV6-ENTRY ANGPT1 ([RC219398], Right lane) cDNA for 48 hrs and lysed. Equivalent amounts of cell lysates (5 ug per lane) were separated by SDS-PAGE and immunoblotted with anti-ANGPT1 (1:500). Positive lysates [LY400458] (100ug) and [LC400458] (20ug) can be purchased separately from OriGene.
